Welcome to the 2013 Annual Meetings for ILSI, ILSI North America, ILSI Research Foundation, and ILSI Health and Environmental Sciences Institute. It is our great pleasure to welcome so many members, trustees, advisors, and other colleagues from around the world to Miami, Florida, USA. Fostering global perspectives and collaborations has been the focus of this annual meeting since its inception and we feel most grateful to be able to continue this important work.

Our scientific programs will present the state of knowledge on a variety of topics and encourage open discussions on some of our most pressing issues. Presentations will be led by highly respected scientific experts from academic research institutions, government agencies and industrial organizations. The format, designed to foster both formal and informal discussions, promotes an environment rich in the exchange of ideas with colleagues from around the world and increases involvement in scientific activities organized by ILSI’s branches and other entities.

Complimenting the scientific sessions are the keynote presentations at both the ILSI North America and ILSI Assembly of Members meetings, both being held on Sunday, 20 January. At the ILSI North America meeting on Sunday morning, Dr. Ivan Oransky, New York University, will discuss “A Vanishing Monopoly? The Changing Role of the Media in Reporting About Science.” At the ILSI meeting on Sunday afternoon, Mr. Erik Olson, Pew Charitable Trusts will discuss “Decision-making on Food Additives: The Appropriate Role for Public-Private Partnerships Delivering Useful Science” and Prof. Vittorio Silano, Medical School of the University of Rome, will present on the topic of “European Perspective on Ensuring Food Safety.”

ILSI continues to promote sound scientific programs aimed to improve the health of the public throughout the world in the areas of food safety, nutrition, toxicology, risk assessment and the environment. Together, we continue to forge partnerships that help create a safer, healthier world.
