Gregory M Pavela, PhD

Gregory Pavela is an assistant professor in the Department of Health Behavior at the University of Alabama at Birmingham. His research focuses on how early life experiences influence the health and obesity of midlife and older adults and whether these experiences may modify the association between obesity and mortality. His research is currently supported by the National Institutes of Health (NIH). As a postdoctoral fellow at the Nutrition and Obesity Research Center at the University of Alabama at Birmingham, he used both secondary data and randomized controlled trials to identify relevant dimensions of socioeconomic status for weight outcomes. Greg received his PhD in sociology from the University of Florida.
